Hi Matt,

Thank you for plotting that well for us. You don't need to produce a site map for this one. I kind of just wanted evidence that the well isn't within the watershed and I think you proved that.

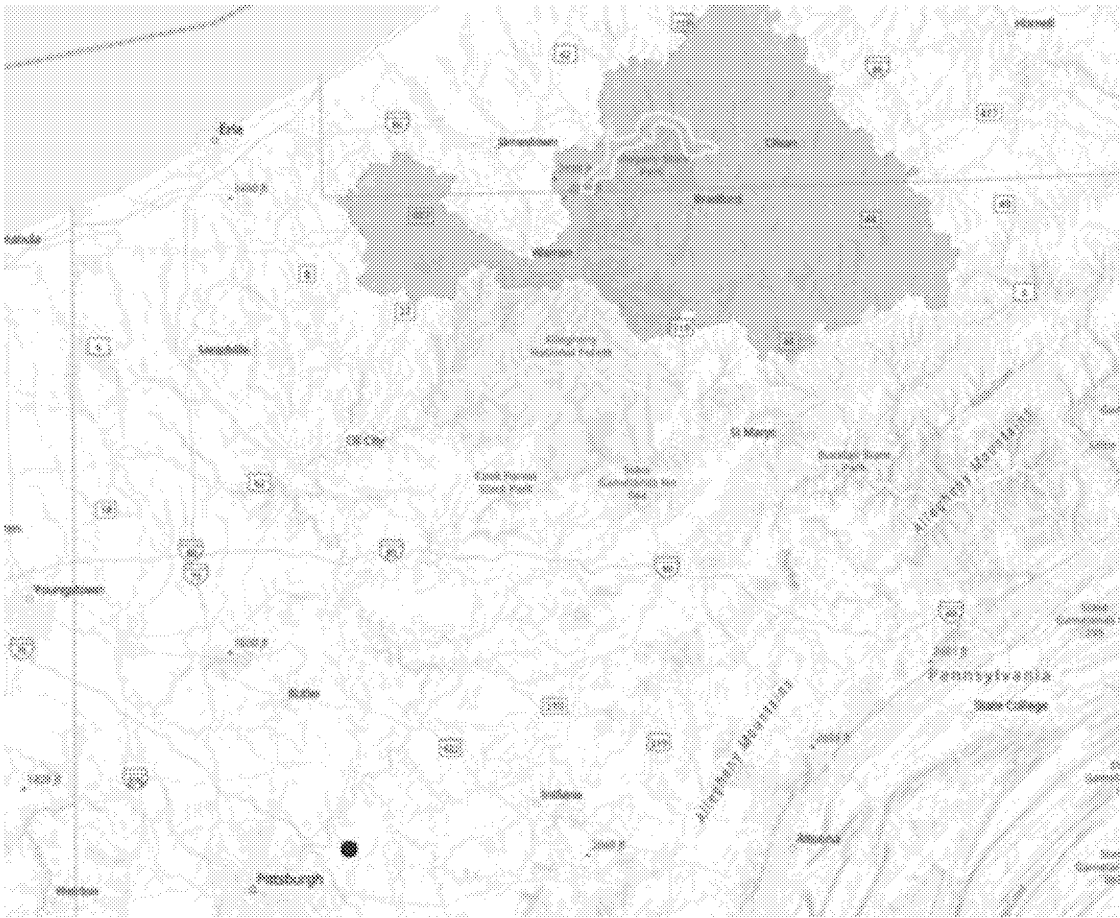

Thank you for your help!

Hi Kevin,

I plotted the new UIC well location (red dot) and wanted to show you the proximity to the Upper Allegheny Watershed:

It's quite far away from the watershed...did you still want me to produce the site map?

Thanks!

- Matt

Subject: UIC Well in Upper Allegheny Watershed

Good afternoon,

Previously, Matt Frank was able to plot an injection well in the Upper Allegheny Watershed using a shape file that the Seneca Nation provided for purposes of a tribal consultation. Our program is really interested in the stream/river structure around the proposed injection well and how it relates to the Upper Allegheny Watershed (i.e., whether the well is located within the watershed or not). Today, we received another application for an injection well in Allegheny County, Pennsylvania. I'd like to see if I can get another map as Matt made us before using the new coordinates. I've attached the map he created for reference. He also created a real-time map in EPA GeoPlatform.

The information for the new UIC well is listed below:

Penneco Environmental Solutions, LLC

EPA Permit # PAS2D702BALL

Sedat #4A Well

Plum Borough

Allegheny County

Pennsylvania

Latitude: 40.526916 Longitude: -79.711027
